

Dear Hiring Team,

I am writing to express my strong interest in joining your engineering team. As a Full-Stack Software Engineer with over 3 years of professional experience, I specialize in building and scaling web and mobile applications.

Throughout my career - including my recent role as a Lead Mobile Developer - I have successfully delivered production-ready solutions using React, Next.js, React Native, and Python/Django. I pride myself on my ability to own the entire development lifecycle, bridging the gap between pixel-perfect UI design and robust, secure backend architecture. Whether I am integrating complex REST/GraphQL APIs, optimizing cloud deployments on AWS, or mentoring team members in agile workflows, my focus is always on writing clean, maintainable code that drives business results.

I thrive in fast-paced environments and am highly adaptable to new technologies and technical challenges. I have attached my resume for your review and invite you to explore my portfolio at <https://karume.vercel.app> to see my recent projects and code samples. Thank you for your time and consideration. I look forward to the opportunity to discuss how my technical expertise and problem-solving mindset can immediately contribute to your team's success.

Best regards,
Daniel Karume
